Site Reliability Engineer with 7+ years operating distributed infrastructure at scale on AWS and Kubernetes. Led a zero-downtime production migration from ECS to EKS, architected an entire AWS platform using Terraform, and deployed full-stack observability with Prometheus, Grafana, Loki, and Tempo. Led SOC 2 Type II certification for a SaaS platform. Currently working async-first from India for a distributed Australian company. Holds CKA, CKAD, AWS Solutions Architect Associate, and GCP Professional Cloud Architect certifications.

Core Competencies

- **Kubernetes & Cloud:** EKS production operations, Helm/Helmfile, KEDA autoscaling, pod disruption budgets; AWS (VPC, RDS Aurora, SQS, Route53, IAM/IRSA) and GCP certified
- **Infrastructure as Code:** Terraform across compute, database, messaging, auth, and networking layers; Ansible, CloudFormation, SOPS, runbook development
- **Observability:** Prometheus, Grafana, Loki, Tempo, Alloy, OpenTelemetry, Blackbox Exporter, distributed tracing, alerting
- **Programming & Scripting:** Go (working level), Python (strong), Bash (strong), FastAPI, Django; GitLab CI, GitHub Actions
- **Security & Compliance:** SOC 2 Type II certification lead, infrastructure hardening, security auditing, secrets management (SOPS, KMS)

Professional Experience

- **Hey Amara (HJ Recruitment)** **Remote, Australia**
Senior DevOps Engineer *Jul 2025–Present*
 - Executed a zero-downtime production migration from ECS to EKS, cutting over all services with GitOps tooling (Helm, Helmfile, KEDA, SOPS) while maintaining availability for end users.
 - Architected the entire AWS platform from scratch using Terraform across VPC, EKS, RDS Aurora, Cognito, SQS, SNS, AmazonMQ, ElastiCache, KMS, Route53, and IAM/IRSA, reducing environment provisioning from days to under 2 hours.
 - Deployed full-stack observability (Prometheus, Grafana, Loki, Alloy, Tempo, OpenTelemetry) with SLO-driven alerting and end-to-end distributed tracing across all microservices.
 - Implemented KEDA-based autoscaling tied to SQS queue depth and HTTP traffic, with Fargate Spot and graceful preemption handling to balance reliability and cost.
 - Reduced operational toil by building an internal Python CLI tool for secure SSM-based access to RDS, Redis, and RabbitMQ, eliminating manual credential management and bastion overhead.
 - Cut compute costs by 40% through Fargate Spot adoption, right-sizing, and traffic-aligned autoscaling policies.
- **Bodo.ai** **Remote, USA**
Senior DevOps & Full Stack Engineer *Apr 2022–Mar 2025*
 - Led SOC 2 Type II certification for a multi-tenant SaaS platform by driving infrastructure hardening, security auditing, and audit-readiness across all production environments.
 - Cut CI/CD pipeline runtime from 45 to 20 minutes by refactoring GitHub Actions with parallelized stages, Docker layer caching, and dependency optimization.
 - Managed Kubernetes clusters on EKS with Spot instances, implementing graceful draining, pod disruption budgets, and automated node replacement for reliable batch workload scheduling.
 - Mentored junior engineers on Kubernetes operations, incident response, and root cause analysis; documented runbooks and post-incident reviews to build repeatable practices.

- **Ninjacart** **Bengaluru, India**
Software Development Engineer *Sep 2021–Mar 2022*
 - Developed backend API services handling millions of daily transactions for India's largest B2B fresh produce supply chain.
 - Reduced manual deployment effort by 50% by building automated CI/CD pipelines with standardized release processes.
- **Wipro (Apple Client)** **Hyderabad, India**
Software Developer *Jul 2019–Sep 2021*
 - Built a demand planning system using ArangoDB and Python, improving supply chain forecast accuracy through database-driven analytics.
 - Managed Kubernetes CI/CD pipelines with zero-downtime rolling update strategies serving production workloads.

Education

- **Vellore Institute of Technology (VIT)** **Vellore, India**
B.Tech in Computer Science *2015–2019*
CGPA: 8.94 / 10

Certifications

- Certified Kubernetes Administrator (CKA), CNCF
- Certified Kubernetes Application Developer (CKAD), CNCF
- AWS Certified Solutions Architect – Associate, AWS
- Google Cloud Professional Cloud Architect, Google Cloud

Languages

- Telugu (native), English (professional working), Hindi (limited working).

Honors and Awards

- **Role Model Award** – Wipro / Apple Client (Dec 2020). Recognized for exemplary contribution quality.
- **Google Scholarship** – Udacity (Jul 2019). Selected for Mobile Web Specialist Nanodegree.
